Myasnikov, I. A. and Pshezhetskly, S. Ya.
 DESCRIPTION OF OXYGEN WITH ZnO BY THE
 ACTION OF LIGHT, AND ITS EFFECT ON THE
 LIGHT CONDUCTIVITY. [1960] 8p. 9 refs.
 Order from LC or SLA m\$1.80, ph\$1.80 61-10129

Trans. of Akademiya Nauk SSSR. Doklady, 1954,
 v. 99, no. 1, p. 125-126.

The heating of the film of ZnO in the presence of oxygen leads to a nonreversible decrease of its conductivity, while with illumination of the film in the presence of oxygen, a reversible growth of the conductivity occurs. Preliminary heating of the ZnO film in oxygen leads to a decrease both its dark conductivity and its photoconductivity. The maximum of the spectral characteristics of the photoconductivity shifts toward the longer wavelength spectrum. The photoconductivity at 17°C of ZnO previously heated in oxygen decreases in comparison with the photoconductivity at 20°C, and the maximum of the spectral characteristics shifts still toward the longer wavelength. (U.S.S.R.)
